

REPORT

From the office of the...
The Engineering Caucus

TO: Members of the Student Representative Assembly
FROM: Aniruddh Arora
SUBJECT: SRA 22F Report
DATE: 11 September 2022

Caucus members:
Aniruddh
Veronica
Dominic
Brandon
Nour

Progress on Year Plan

We made progress in establishing our communication platforms.

We have set up efficient channels on teams and Instagram to keep each other in check throughout our terms.

Because I believe having a strong foundational accountability principle for every caucus member is important at the beginning of the year to achieve greater successes and open bigger opportunities in the future.

Past Events, Projects, & Activities

Accounts:

We reached to the admin and social media accounts but have not received replies, so we haven't been able to get access to it. Personal social media accounts have been utilized to promote events as much as possible.

Upcoming Events, Projects, & Activities

We want to reach out to the different streams, to discuss in detail what the student union is about and how it can be helpful for them. We were waiting for the semester to get started a little bit so that everyone had enough time to settle in.

We realize engineering is very stressful for most students.

We want to focus on Student Accessibility and Utility.

We want to focus on longer hours and availability of flexible online appointments for the Student Success Center and Student Wellness Centre.

Outreach & Promotions

We want to reach out to the Computer Science and MES society to plan more coordinated events which can help students in job search and learning more about the engineering community at McMaster.

Successes

During the past week, welcome week was organized, club fest was organized. The engineering caucus helped in promoting such events.

Current Challenges

Increase library hours since again, engineering is stress, and a comfortable, reliable quiet and secure place to study can assist students to relieve a lot of anxiety.

More 24/7 air-conditioned locations for students to study and spend their time in should be our priority.

Increase food outlet hours to accommodate various schedules.

Best,

Aniruddh Arora
