

How much funding are you seeking from MSU?

1. From the MSU, we are seeking \$4,555.74.

There seems to be a discrepancy between the ending balance and the beginning balance. Could you please provide clarification?

2. I am not sure what discrepancy you are referring to, can you please clarify?

What specific expenses are included under "miscellaneous costs" in lines 44 and 52?

3. Misc. costs include decorations, paying for deliveries, deposits, and any tech needed for the events. It basically covers any 'extra' or unexpected costs.

Could you outline the budget allocation for venue costs related to case competitions and the engineering conference?

4. Our case competition will be held at PG, so venue cost was not included. We are still in the process of brainstorming venues for the conference and after doing some research, the venue should cost around \$1000 (hopefully CIBC hall, with Mac services and food!).

Can you specify the activity you are referring to?

5. We are hoping to do an escape room or karaoke night with our team, with a pizza dinner.

What strategies or efforts have you undertaken to secure funding from MES, the Engineering faculty, or other potential sponsors?

6. We have submitted a similar budget to the MES, and are still waiting to hear back from them. We are hopeful that the funding from both the MES and MSU will cover our costs for the year.
