

REPORT

From the office of the...
Engineering Caucus

TO: Members of the Student Representative Assembly
FROM: Jialiang (Kevin) Hu, SRA Eng caucus leader
SUBJECT: SRA 23L Report
DATE: Jan 5, 2023

Progress on Yearplan

Significant progress has been made in terms of outreach and networking. The caucus has reestablished connection with the MES and had attended two regular MES meetings.

Past Events, Projects, & Activities

Yaseen and I representing SRA Eng had officially reconnected with MES after a very long period of disconnection. We had attended two MES meetings and one meeting with the president of MES. I also attended SAGM (MES version of the general assembly) which impressed me the most as they reached quorum this year.

SRA Eng social media account has started reposting MES content.

Upcoming Events, Projects, & Activities

I will continue attending MES meetings regularly and hopefully establish a strong relationship with them to better serve the Eng community, There're plans for more social media outreach.

Outreach & Promotions

A lot of MES contents as we currently do not have the capacity to produce our own contents (hopefully later we will)

Successes

Successfully built connection with the MES and had introduced the SRA to the council.

Current Challenges

Struggling to come up with events that will bring the caucus together.
Lack of social media engagement.

Best,

Jialiang (Kevin) Hu
